

We are hiring postdocs!

The Optical Fiber Communications Laboratory (<https://www.creol.ucf.edu/ofc/>) is seeking postdoctoral fellows to participate in research in integrated photonic systems for applications in communication, signal processing and computing. Candidates with expertise in the one or more of the following areas are encouraged to apply:

- Modelling, design and optimization of photonic devices using custom and commercial design and simulation packages.
- Integrated device fabrication (in house and/or via foundry services) using various material platforms.
- Optical and electro-optical characterization of integrated devices and subsystems.
- Digital signal processing, control/optimization, AI/ML.
- System applications/demonstrations.

Please submit your application or send inquiries to Professor Guifang Li at li@ucf.edu.
